WFM forecast and schedule

WFM is part of WEM and arrives with CX 3 on the overview. Short-term: interval data, up to six weeks, can generate a schedule. Long-term: day and week data, up to two years, seasonality only. Schedule with a forecast, without one, or blank. Maximum six weeks. The schedule dates must sit inside the short-term forecast. One generation per business unit at a time. Swapping the forecast does not move agent shifts until you reschedule.
